PlayPower is a family of brands dedicated to inspiring people of all ages to experience the power of play. Together we’re the global leader in producing unique experiences for indoor, outdoor, and aquatic locations. We are experts in providing distinctive, memorable experiences that encourage everyone to be together and enjoy more playful lives.

PlayPower’s manufacturing facilities in the United States encompass more than 1 million square feet. In addition, we have 65,000 square feet of manufacturing space in Mexico and 290,000 square feet in Europe. Within these spaces, PlayPower brands deliver full manufacturing capabilities in rotational molding, metal fabrication and finishing, woodworking, soft goods assembly, fiberglass molding, and rope design and engineering.

Transform the Ultimate Outdoor Experience

PlayPower will help Boy Scouts of America increase camp participation by creating one-of-a-kind experiences proven to delight scouts of all ages.

We will achieve this through a turnkey process ranging from collaborative custom design to full build-out of unique and innovative outdoor experiences thoroughly appropriate for the Boy Scouts of America organization. Play is one of the most transformative things humans do.

We believe play is essential for us to thrive. Through this commitment, we promote happier individuals and healthier communities.
ADVANCING THE POWER OF PLAY

We’d like you to meet one of the greatest families in the world. PlayPower. We lead the world in recreation equipment manufacturing—everything from commercial playgrounds to floating modular boat docks, all professionally supported by over 500 sales consultants around the world. We’re one family of 12 brands working to create the best experience for you. A good family can make all the difference!

MAKE IT MEANINGFUL

Is the outdoor experience developmentally appropriate for the participants? Does it provide opportunities for true inclusion? When generating and evaluating our play concepts, we consider opportunities for cognitive, creative, physical, sensory, social, and emotional development. By maximizing the meaningful value of our designs, we increase engagement and positive outcomes. Our goal is to advance play worldwide by building friendships, promoting health, and strengthening our communities.

MAKE IT RELEVANT

Scouting today is vastly different from that of previous generations. More electronic connection. More physical isolation. Less riding bikes down the street and playing in the woods. Issues like obesity, hyper-competition, and toxic stress swirl through today’s adolescent years, along with an ongoing flood of technological and design innovations. To attract scouts, hold their attention, and spark their imaginations, outdoor experiences must innovate and evolve; not with mere cosmetic variations, but with fresh, foundational concepts that make them compelling.
WE ARE A GLOBAL BUSINESS
1,800 People Strong, Working Together
